Subject: Business Lab Participant Task Catalogue and Operational Guidelines

Dear Participant,

This document constitutes the official Task Catalogue and Operational Guidelines for the GO-BRICS Business Lab Programme (Cohort I). It sets out all tasks available across the Tech, Product & Production Research, Sales, Content, and Operations Departments — including their grade, GO-BRICS Points (GBP) value, completion criteria, and proof requirements.

All participants are required to read this catalogue in full before undertaking any task submission. Compliance with the stated output standards, proof requirements, and submission caps is mandatory. Tasks completed without meeting the specified criteria will not be eligible for GBP allocation.

This catalogue is effective immediately from the date of issue and supersedes any prior informal task listings communicated through team channels.

TECH DEPARTMENT TASKS

(15 Tasks · Grades D → S)

TASK_T01 — Digital Tools Setup and Documentation Grade D | 30 GBP | 1 MP |
Open | Tech

Who can do it: Any participant with basic computer and internet skills

Estimated time: 1–2 hours

Objective: Set up an assigned digital tool for team use (e.g., Trello board, Notion workspace, Slack channel structure, Google Drive folder hierarchy, or a shared password manager). Tool must be configured with correct permissions, naming

conventions, and basic onboarding notes so any team member can use it without guidance.

Expected output: Fully configured tool environment with a 1-page setup guide covering what it is, how to access it, and the 3 most common actions a team member would need to perform.

Proof required: Screenshot of completed setup + shared link or access credentials submitted to Ops + setup guide document.

Cap: 2 times per month per person · One tool per submission

TASK_T02 — Tech Stack Research Report Grade D | 35 GBP | 1 MP | Open | Tech

Who can do it: Any participant with research skills and basic tech literacy

Estimated time: 1–2 hours

Objective: Research and compare at least 3 tools or platforms for an assigned technical need (e.g., email marketing platforms, CRM systems, e-commerce builders, analytics tools, or video hosting). For each option, document: key features, pricing, ease of use, integration capability, and best-fit use case. Conclude with a ranked recommendation.

Expected output: Structured comparison report with a summary table (3+ tools × 5 criteria) and a final ranked recommendation with justification.

Proof required: Submitted report document + Tech Lead review.

Cap: 3 times per month per person · One category per submission

TASK_T03 — Data Collection and Cleaning Script Built Grade C | 55 GBP | 2 MP | Open | Tech

Who can do it: Participants with basic Python, JavaScript, or spreadsheet formula skills

Estimated time: 2–3 hours

Objective: Build a reusable script or formula-based tool that collects data from an assigned source (web form, spreadsheet, or API endpoint) and outputs a clean, structured dataset. Script must handle at least 3 common data quality issues — such

as duplicates, empty fields, or inconsistent formatting — and produce a clean output file.

Expected output: Working script or tool + a sample cleaned output dataset with a minimum of 50 rows + a brief readme explaining inputs, outputs, and how to run it.

Proof required: Script file or shareable tool link + sample output file + brief readme submitted to Tech Lead.

Cap: 2 times per month per person

TASK_T04 — API Integration Tested and Documented Grade C | 60 GBP | 2 MP | Open | Tech

Who can do it: Participants with API or developer tool experience

Estimated time: 2–4 hours

Objective: Test a functional integration between two assigned platforms using their APIs or a no-code connector (Zapier, Make, n8n, or similar). Integration must pass data between systems correctly, handle at least one error case, and be documented clearly enough for a non-technical team member to understand what it does and how to monitor it.

Expected output: Live working integration + a documentation note covering: what triggers it, what it does, what the output looks like, and how to check if it breaks.

Proof required: Screenshot of live integration flow + test run log showing data passed correctly + documentation note submitted.

Cap: 2 times per month per person · One integration per submission

TASK_T05 — CRM System Set Up and Customised Grade C | 65 GBP | 2 MP | Open | Tech

Who can do it: Participants with CRM or database tool experience

Estimated time: 3–4 hours

Objective: Set up and customise a CRM system (HubSpot free tier, Notion database, Airtable, or equivalent) for an assigned sales or outreach function. CRM must include custom fields relevant to the use case, pipeline stages, at minimum 10 test records entered, and be shared with the relevant team with correct permissions.

Expected output: Live CRM with correct structure, 10+ test entries, pipeline stages configured, and a short user guide for the team.

Proof required: Live shareable CRM link + screenshot of populated pipeline + user guide document.

Cap: 1 time per month per person

TASK_T06 — Website Performance Audit Completed Grade B | 80 GBP | 3 MP | Open | Tech

Who can do it: Any participant with basic web or SEO knowledge

Estimated time: 2–3 hours

Objective: Run a full performance and SEO audit on an assigned website using tools such as Google PageSpeed, GTmetrix, or similar. Document scores, identify the top 5 issues, and provide fix recommendations.

Expected output: Audit report covering load speed, mobile score, SEO basics, and top issues — with at least 5 specific actionable recommendations.

Proof required: Tool audit screenshot + submitted report document.

Cap: 2 times per month per person

TASK_T07 — Email Automation Sequence Set Up Grade B | 70 GBP | 3 MP | Open | Tech

Who can do it: Participants with email marketing or automation tool experience

Estimated time: 2–4 hours

Objective: Set up an automated email sequence of at least 3 emails for an assigned use case (welcome series, follow-up, or re-engagement) using any email automation tool. Emails must be live and triggerable.

Expected output: Live automation sequence with 3+ emails, correct trigger conditions set, and a test run completed successfully.

Proof required: Screenshot of live sequence flow + test email received in inbox.

Cap: 2 times per month per person

TASK_T08 — Team Communication Workspace Fully Configured Grade B | 90 GBP | 3 MP | Open | Tech

Who can do it: Participants with platform administration experience (Slack, Telegram, Discord, or similar)

Estimated time: 3–4 hours

Objective: Build and fully configure a structured team communication workspace for an assigned group. Workspace must include organised channels or groups by department and function, pinned key resources in each channel, role-based access settings, a welcome/onboarding message, and a bot or automation for at least one recurring task (e.g., daily standup prompt, GBP reminder, or task deadline alert).

Expected output: Fully live workspace with all channels configured, permissions set, and at least one automation running — with a setup guide documenting the structure.

Proof required: Screenshot of workspace structure + automation running proof + setup guide submitted to Tech Lead.

Cap: 1 time per month per person

TASK_T09 — Product Landing Page Built and Deployed Grade B | 110 GBP | 3 MP | Open | Tech

Who can do it: Participants with web building skills (Webflow, Wix, Framer, WordPress, or hand-coded HTML/CSS)

Estimated time: 4–6 hours

Objective: Build and deploy a complete, live product landing page for an assigned product or brand. Page must include: hero section with headline and CTA, product feature highlights, a trust/credibility section (certifications, testimonials, or endorsements), pricing or enquiry section, and mobile-responsive design.

Expected output: Live published URL, mobile-responsive, loading in under 3 seconds on a standard connection, with all links functional.

Proof required: Live URL + PageSpeed screenshot showing performance score + mobile view screenshot.

Cap: 1 time per month per person · One product per submission

TASK_T10 — Social Media Analytics Tool Built Grade B | 120 GBP | 3 MP | Unique | Tech

Who can do it: Participants with analytics or data tool experience

Estimated time: 4–6 hours

Objective: Build a reusable analytics tracking sheet or dashboard that pulls and organises social media metrics (reach, engagement, follower growth) from an assigned platform into a structured, easy-to-read format for the team.

Expected output: Live tool or dashboard link with at least 30 days of data populated and auto-updating or clearly instructed for weekly updates.

Proof required: Live tool link + sample data export + screenshot of populated dashboard.

Cap: 1 time per month · Unique — submitted once per programme

TASK_T11 — AI Chatbot Prompt Setup Grade A | 200 GBP | 5 MP | Unique | Tech

Who can do it: Participants with AI / prompt engineering experience

Estimated time: 4–6 hours

Objective: Build and deploy a functional AI chatbot for an assigned use case (customer support, FAQs, or lead capture) using any no-code or API-based tool. The bot must be live and testable.

Expected output: Live chatbot link with at least 10 trained responses covering the assigned topic, plus a short setup guide.

Proof required: Live chatbot link + workflow/prompt screenshots + sample conversation recording.

Cap: 1 time per month · Unique — submitted once per programme

TASK_T12 — Custom Automation Workflow Built Grade A | 170 GBP | 5 MP | Open | Tech

Who can do it: Participants with automation platform experience (Make, Zapier, n8n, or custom scripting)

Estimated time: 5–7 hours

Objective: Design and deploy a multi-step automation workflow for an assigned business process (e.g., lead capture to CRM entry to email trigger, task submission to GBP logging, or order received to fulfilment notification). Workflow must involve at least 4 steps, handle an error or edge case, and run without manual intervention once triggered.

Expected output: Live, running automation workflow + a flow diagram showing all steps and logic branches + a 72-hour test log showing at least 3 successful runs.

Proof required: Workflow link or screenshot of full flow + test run log + error handling documentation submitted to Tech Lead.

Cap: 2 times per month per person · One process per submission

TASK_T13 — Full Tech Infrastructure Audit and Roadmap Grade A | 160 GBP | 5 MP | Unique | Tech

Who can do it: Participants with broad technical knowledge and systems-thinking ability — Tech Lead approval required before starting

Estimated time: 6–8 hours

Objective: Conduct a full audit of the team's current tech infrastructure — covering all tools in use, integrations, costs, redundancies, security gaps, and performance issues. Then produce a 90-day tech roadmap recommending what to keep, replace, integrate, or deprecate — with prioritised actions, estimated time to implement, and expected impact.

Expected output: Audit report (current state) + 90-day roadmap (recommended state), together forming a complete Tech Infrastructure Review document of minimum 12 pages or equivalent structured sections.

Proof required: Submitted full document + Tech Lead and Ops sign-off.

Cap: 1 time per programme · Unique — one per team

TASK_T14 — Integrated Tech Stack Deployed for Full Team Grade S | 380 GBP | 10 MP | One-Time | Tech

Who can do it: Participants with senior technical capability — Tech Lead and Chief Administrator approval required

Estimated time: 12–18 hours across multiple sessions

Objective: Design, build, and hand over a fully integrated tech stack that connects all key operational functions — task management, CRM, content scheduling, analytics, and communication — into a single cohesive system usable by all 30 teams and 5 admins. System must include clear documentation, permission tiers, and a live onboarding walkthrough delivered to the Tech Lead and at least 2 admins.

Expected output: Fully operational integrated system, live and accessible by all teams, with complete documentation and a completed onboarding session.

Proof required: Live system link + documentation package + onboarding session recording or notes + Chief Administrator sign-off.

Cap: 1 time per programme · One-Time — awarded to first team to deliver an approved system

TASK_T15 — AI-Powered Internal Tool Built and Deployed Grade S | 450 GBP 10 MP | One-Time | Tech

Who can do it: Participants with AI development, prompt engineering, or API integration skills — Tech Lead approval required before starting

Estimated time: 15–20 hours across multiple sessions

Objective: Conceptualise, build, and deploy an AI-powered tool that solves a real, specific operational problem for the Business Lab — such as an AI task recommender based on participant skill and history, an automated GBP audit assistant, an AI-powered B2B lead qualifier, or a content brief generator. Tool must be genuinely useful, reliable under repeated use, and handed over with full documentation and a team demo session.

Expected output: Live, deployed tool accessible to the team — not a prototype or demo — with a user guide, technical documentation, and a recorded or live demo session delivered to Tech Lead and Ops.

Proof required: Live tool link + user guide + technical documentation + demo session recording or attendance confirmation + Tech Lead and Chief Administrator sign-off.

Cap: 1 time per programme · One-Time — awarded to first team to deliver an approved, deployed tool

PRODUCT & PRODUCTION RESEARCH DEPARTMENT

(10 Tasks · Split: 5 Product Research + 5 Production Research · Grades D → S)

SECTION A — PRODUCT RESEARCH (5 Tasks)

TASK_PR01 — Competitor Product Benchmarking Report Grade D | 30 GBP | 1 MP | Open | Product Research

Who can do it: Any participant with research skills

Estimated time: 1–2 hours

Objective: Research and benchmark 5 competitor or comparable products for an assigned product category. For each, document: product name, brand, key materials or ingredients, claimed benefits, price point, packaging style, customer ratings (if available), and one standout differentiator. Conclude with a summary of where the assigned product stands relative to the field.

Expected output: Comparison table (5 products × 7 criteria) + a 200-word summary positioning the assigned product within the competitive landscape.

Proof required: Submitted report + source links for all 5 products.

Cap: 3 times per month per person · One product category per submission

TASK_PR02 — Market Demand Validation Report Grade C | 60 GBP | 2 MP | Open | Product Research

Who can do it: Participants with market research or analytical skills

Estimated time: 3–4 hours

Objective: Validate consumer demand for an assigned product in a target market using a combination of primary and secondary research. Secondary sources include Google Trends, e-commerce search volumes, and existing market reports. Primary validation must include at minimum a 10-response survey or 3 structured consumer

interviews. Report must conclude with a demand signal rating (Strong / Moderate / Weak) and supporting rationale.

Expected output: 600–900 word report with data visualisations or tables where applicable, survey/interview responses attached as an appendix, and a clear demand conclusion.

Proof required: Submitted report + raw survey data or interview notes + research source citations.

Cap: 1 time per month per person · One product per submission

TASK_PR03 — Product Feature Specification Document Grade B | 90 GBP | 3 MP | Open | Product Research

Who can do it: Participants with technical writing or product development knowledge

Estimated time: 3–5 hours

Objective: Produce a detailed product feature specification document for an assigned product. Document must cover: product name and category, physical specifications (dimensions, weight, material composition), functional claims with supporting references, safety and compliance considerations, packaging requirements, labelling requirements (regulatory and brand), and recommended storage and handling conditions.

Expected output: Complete specification document formatted as a professional reference document, usable by the production team and for regulatory submissions. Minimum 500 words plus specification tables.

Proof required: Submitted specification document + at least 3 cited sources supporting technical or regulatory claims + Community Lead review.

Cap: 1 time per month per person · One product per submission

TASK_PR04 — Consumer Persona and Insight Report Grade A | 160 GBP | 5 MP | Open | Product Research

Who can do it: Participants with market research, psychology, or consumer behaviour knowledge

Estimated time: 5–7 hours

Objective: Build 3 detailed consumer personas for an assigned product category, based on a combination of primary research (minimum 15 survey responses or 5 interviews) and secondary data. Each persona must include: demographic profile, psychographic profile, buying motivations, purchase barriers, preferred channels, price sensitivity, and a representative quote. Conclude with 5 product or marketing recommendations derived directly from the insights.

Expected output: Full consumer insight report with 3 fully developed personas, data appendix, and a 5-point recommendation section — formatted as a shareable, professional document.

Proof required: Submitted report + raw primary research data attached + Community lead sign-off.

Cap: 1 time per month per person · One product category per submission

TASK_PR05 — Full Product Research Dossier Grade S | 320 GBP | 10 MP | One-Time | Product Research

Who can do it: Participants who have completed at least Tasks PR02 and PR03 — Ops approval required before starting

Estimated time: 12–18 hours across multiple sessions

Objective: Produce a comprehensive, publication-ready product research dossier for a newly assigned product, covering the full scope of: competitive landscape (10 products), demand validation (primary + secondary), regulatory and compliance overview (applicable certifications, import/export requirements, labelling laws in the target market), consumer persona set (3 personas), pricing architecture (cost-to-shelf analysis with margin recommendations), and a go/no-go launch recommendation with supporting evidence.

Expected output: Complete dossier of minimum 25 pages or equivalent structured sections, presented as a professional PDF or Notion document — suitable to be handed directly to the Sales Lead and Tech Lead as a launch intelligence brief.

Proof required: Submitted full dossier + Community Lead sign-off + brief presentation delivered to at least 3 team leads.

Cap: 1 time per programme · One-Time — one per product assigned

SECTION B — PRODUCTION RESEARCH (5 Tasks)

TASK_PP01 — Supplier Directory Compiled Grade D | 35 GBP | 1 MP | Open | Production Research

Who can do it: Any participant with research skills

Estimated time: 1–2 hours

Objective: Research and compile a verified directory of at least 15 suppliers or manufacturers for an assigned raw material, component, or product type. Each entry must include: company name, country, contact method (email, website, or trade platform profile), minimum order quantity (if listed), and an initial quality or credibility assessment (verified website, trade registration, or platform rating).

Expected output: Structured supplier directory spreadsheet with 15+ entries and a credibility score column with brief justifications.

Proof required: Submitted spreadsheet + source links for at least 10 entries.

Cap: 3 times per month per person · One material or product type per submission

TASK_PP02 — Manufacturing Process Research Report Grade C | 55 GBP | 2 MP | Open | Production Research

Who can do it: Participants with research and technical comprehension skills

Estimated time: 2–4 hours

Objective: Research and document the manufacturing or production process for an assigned product type — from raw material to finished good. Report must cover: key production stages, equipment or technology involved, typical quality control checkpoints, common defects or failure modes and how they are caught, estimated production timeline per batch, and key variables that affect output quality.

Expected output: 600–900 word report with a process flow diagram or clearly numbered stage breakdown, plus a list of 5 quality control checkpoints with pass/fail criteria.

Proof required: Submitted report + source citations + Ops review.

Cap: 2 times per month per person · One product type per submission

TASK_PP03 — Supply Chain Route Analysis Completed Grade B | 100 GBP | 3 MP | Open | Production Research

Who can do it: Participants with logistics, trade, or supply chain knowledge

Estimated time: 4–5 hours

Objective: Analyse and document at least 2 viable supply chain routes for an assigned product travelling between an assigned origin and destination country pair. For each route, cover: shipping method (air, sea, land, or multimodal), estimated transit time, cost range per shipment unit, key customs and documentation requirements, applicable HS codes and duty rates, known risk factors, and recommended forwarder or logistics platform.

Expected output: Route analysis report with a side-by-side comparison table (2+ routes × 8 criteria) and a recommended route with justified rationale.

Proof required: Submitted report + source references for duty rates and logistics cost estimates + Ops sign-off.

Cap: 1 time per month per person · One country pair per submission

TASK_PP04 — Production Feasibility and Unit Cost Report Grade A | 170 GBP | 5 MP | Open | Production Research

Who can do it: Participants with costing, manufacturing, or business analysis experience with the Community leads permission.

Estimated time: 6–8 hours

Objective: Produce a production feasibility and unit cost breakdown report for an assigned product. Report must cover: raw material cost per unit (sourced from at least 2 supplier quotes or verified price references), estimated labour cost per unit, packaging cost, quality control cost allocation, logistics cost to warehouse, and total landed cost per unit. Conclude with a breakeven analysis at 3 MOQ scenarios (low, medium, high) and a feasibility verdict (Commercially Viable / Marginal / Not Viable at this stage) with supporting rationale.

Expected output: Complete costing report with unit cost model (as a spreadsheet or table), breakeven analysis at 3 MOQ levels, and a written feasibility conclusion of 300–500 words.

Proof required: Submitted report + costing spreadsheet + at least 2 supplier price references + Ops sign-off.

Cap: 1 time per month per person · One product per submission

TASK_PP05 — End-to-End Production Blueprint Delivered Grade S | 350 GBP | 10 MP | One-Time | Production Research

Who can do it: Participants who have completed Tasks PP02, PP03, and PP04 — Ops and Chief Administrator approval required before starting

Estimated time: 15–20 hours across multiple sessions

Objective: Deliver a complete, actionable end-to-end production blueprint for an assigned product — from raw material sourcing through manufacturing, quality assurance, packaging, logistics, customs clearance, and warehousing to the point of sale. Blueprint must include: a verified supplier shortlist (top 3, with quotes), selected manufacturing process with quality control plan, packaging and labelling specification, selected supply chain route with contingency, full unit cost model across 3 volume tiers, a production timeline (Gantt chart or equivalent), regulatory compliance checklist for origin and destination countries, and a risk log with mitigation strategies.

Expected output: Complete production blueprint document — minimum 30 pages or equivalent structured sections — formatted as an operational reference document ready to be handed to a procurement or operations team for execution. Must be presented in a formal session to at least 3 team leads.

Proof required: Submitted full blueprint + supporting data files (cost model, supplier quotes, compliance checklist) + Chief Administrator sign-off + presentation session confirmation.

Cap: 1 time per programme · One-Time — one per product assigned

SALES DEPARTMENT TASKS

(B2B focused · 13 Tasks · Grades D → S)

GBP Note: The GBP earned for this task is your weight in the sprint pool ; it is not a direct monetary payment. See Amendment No. 1 (GOBRICS-BL-AMD-2026-001) for how pool shares are calculated.

TASK_S01 — B2B Lead List Compiled Grade D | 30 GBP | Open | Sales

Who can do it: Any participant with basic research skills

Estimated time: 1–2 hours

Objective: Research and compile a verified list of 20 potential B2B prospects (retailers, distributors, wellness brands, or institutional buyers) relevant to the assigned product category. Each entry must include company name, contact person, designation, email or LinkedIn, and city.

Expected output: Spreadsheet with 20 complete entries, minimum 80% contactable (verified email or active LinkedIn profile).

Proof required: Screenshot of completed spreadsheet + at least 3 LinkedIn profile URLs verified as active.

Cap: 3 times per month per person

TASK_S02 — Cold Outreach Scripts Drafted Grade D | 35 GBP | Open | Sales

Who can do it: Any participant with written communication skills

Estimated time: 1–2 hours

Objective: Write 3 distinct B2B cold outreach message scripts — one for LinkedIn DM, one for cold email, and one for WhatsApp Business — tailored to a specific buyer persona assigned by the Sales Lead (e.g., Ayurvedic retailer, corporate wellness buyer, spiritual goods distributor).

Expected output: 3 ready-to-send scripts, each personalised for the assigned persona, with subject line (email), opening hook, value proposition, and a clear call-to-action.

Proof required: Document or message thread screenshot showing all 3 scripts, submitted for review before use.

Cap: 2 times per month per person

TASK_S03 — B2B Marketplace Profile Optimised Grade C | 50 GBP | Open | Sales

Who can do it: Any participant with familiarity with IndiaMART, TradeIndia, or similar B2B platforms

Estimated time: 2–3 hours

Objective: Set up or fully optimise a company/product listing on an assigned B2B marketplace (IndiaMART, TradeIndia, or Alibaba). Listing must include complete product details, pricing tiers, MOQ, company credentials, and at least 5 product images.

Expected output: Live and published listing with a completeness score above 85% (or platform equivalent), and at least 1 inquiry triggered within 72 hours of publishing.

Proof required: Live listing URL + platform dashboard screenshot showing profile completeness + screenshot of inquiry received.

Cap: 1 time per month per person · One platform per submission

TASK_S04 — LinkedIn B2B Outreach Campaign Executed Grade C | 55 GBP | **Open | Sales**

Who can do it: Participants with an active LinkedIn account and B2B communication skills

Estimated time: 2–3 hours

Objective: Send personalised LinkedIn connection requests and follow-up messages to 20 verified B2B prospects from an approved lead list. Each message must be customised (not a template copy-paste) and reference the prospect's business relevance.

Expected output: 20 messages sent, with at least 5 positive responses (reply, acceptance, or request for more information).

Proof required: Screenshot of each sent message thread (minimum 20) + summary table showing response rate.

Cap: 2 times per month per person

TASK_S05 — Target Industry Segment Research Report Grade C | 60 GBP | **Open | Sales**

Who can do it: Participants with research and analytical skills

Estimated time: 3–4 hours

Objective: Produce a focused research report on one assigned B2B target industry segment (e.g., Ayurvedic pharmacy chains, corporate gifting companies, yoga studio chains, or spiritual retail networks in India). Report must cover market size estimate, key players, buying behaviour, preferred channels, and top 10 qualified companies to approach.

Expected output: 600–900 word report + a prioritised list of 10 target companies with contact details and rationale for each.

Proof required: Submitted report document + lead list attachment.

Cap: 1 time per month per person · One segment per submission

TASK_S06 — B2B Meeting Successfully Booked Grade B | 80 GBP | Open | Sales

Who can do it: Any participant actively conducting B2B outreach

Estimated time: Ongoing outreach culminating in confirmed booking

Objective: Book a confirmed virtual or in-person meeting with a qualified B2B decision-maker (owner, buyer, category manager, or procurement head) at a target company. Meeting must be scheduled and confirmed in writing.

Expected output: One confirmed meeting with a verified business entity — not a personal contact or family connection.

Proof required: Screenshot of calendar invite or WhatsApp/email confirmation showing company name, contact person, and meeting time + brief context note on how the lead was generated.

Cap: Unlimited · Each unique company counts as one valid submission

TASK_S07 — B2B Partnership Proposal Deck Created Grade B | 100 GBP | Unique | Sales

Who can do it: Participants with business communication or presentation skills

Estimated time: 4–6 hours

Objective: Create a professional B2B partnership proposal deck (8–12 slides) tailored to an assigned partner category (e.g., Isha Life, Giri Trading, corporate wellness brand). Deck must cover brand introduction, product range, B2B pricing, partnership benefits, logistics and supply terms, and a next-step CTA.

Expected output: Polished PDF or presentation deck, ready to share with a real prospect, reviewed and approved by the Sales Lead.

Proof required: Final deck file submitted + Sales Lead sign-off.

Cap: 1 time per programme · Unique — one per team

TASK_S08 — Retailer or Distributor Formally Onboarded Grade B | 120 GBP | Open | Sales

Who can do it: Participants who have completed at least one B2B meeting (Task S06)

Estimated time: Variable — dependent on negotiation cycle

Objective: Successfully onboard a verified retailer or distributor who agrees in writing to stock or resell the assigned product. Onboarding means a confirmed order or written agreement on pricing, terms, and first delivery.

Expected output: Signed or WhatsApp-confirmed purchase intent, order details, and retailer business name and address.

Proof required: Screenshot or scan of written agreement / purchase intent message + retailer's business card or GST/trade registration.

Cap: Unlimited · Each unique business counts once

TASK_S09 — B2B CRM Pipeline Built and Populated Grade A | 150 GBP | Unique | Sales

Who can do it: Participants with CRM or sales pipeline management experience

Estimated time: 5–7 hours

Objective: Build a functional B2B sales CRM pipeline (using Notion, HubSpot free tier, Google Sheets, or equivalent) and populate it with at least 30 qualified leads categorised by stage: Cold, Contacted, Meeting Booked, Proposal Sent, Negotiating, Closed. Each entry must include full contact details, last action taken, and next step.

Expected output: Live, shareable CRM with 30+ entries, at least 5 leads in the "Meeting Booked" or later stage.

Proof required: Live link or shareable file + screenshot of pipeline overview showing all stages populated.

Cap: 1 time per programme · Unique — submitted once per team

TASK_S10 — Letter of Intent (LOI) or MOU Secured Grade A | 200 GBP | Open | Sales

Who can do it: Participants who have reached negotiation stage with a B2B prospect

Estimated time: Variable — dependent on negotiation cycle

Objective: Obtain a signed or formally confirmed Letter of Intent (LOI) or Memorandum of Understanding (MOU) from a B2B partner, indicating their intention to place orders or enter a distribution/reseller agreement.

Expected output: Signed document or confirmed email/WhatsApp chain clearly expressing business intent, company details, and rough volume or value commitment.

Proof required: Scan or screenshot of LOI/MOU + partner's business identity verification (website, GST, or trade registration).

Cap: Unlimited · Each unique company counts once

TASK_S11 — B2B Sales Presentation Delivered to Live Prospect Grade A | 180 GBP | Open | Sales

Who can do it: Participants confident in presenting to business audiences

Estimated time: 1–2 hours for prep + live session

Objective: Deliver a formal B2B sales presentation (virtual or in-person) to a verified business prospect using the approved pitch deck. Presentation must cover product overview, pricing, partnership model, and handle at least 3 objections.

Expected output: Completed live presentation to a real decision-maker, with a debrief note summarising what was discussed, objections raised, and next steps agreed.

Proof required: Screen recording or video clip of the meeting (with prospect's permission) OR post-meeting email follow-up sent to prospect (showing their name and company) + debrief note submitted.

Cap: Unlimited · Each unique company counts once

TASK_S12 — First Confirmed Purchase Order Received Grade S | 350 GBP |
Open | Sales

Who can do it: Participants who have completed onboarding of at least one B2B partner

Estimated time: Dependent on full sales cycle

Objective: Receive a confirmed, paid or payment-confirmed purchase order from a B2B buyer for any product in the assigned catalogue. Order must be from a verified business entity (not a personal consumer).

Expected output: PO document or payment confirmation with company name, product, quantity, and value clearly visible.

Proof required: Screenshot or scan of PO or payment confirmation + buyer's business verification.

Cap: Unlimited · Each unique order counts once

TASK_S13 — Strategic B2B Partnership Agreement Closed Grade S | 500 GBP |
One-Time | Sales

Who can do it: Participants operating at senior sales capacity, with Sales Lead approval

Estimated time: Full sales cycle — multi-week

Objective: Close a formal, documented strategic partnership with a significant B2B entity — such as a national retail chain, an institutional wellness brand, a government procurement channel, or a cross-border trade partner. Agreement must include defined commercial terms, product scope, and minimum order commitment.

Expected output: Signed agreement or formal confirmation from a recognised business entity, with commercial terms clearly documented.

Proof required: Signed agreement document + partner's public business identity (website, registered entity) + Sales Lead and Ops approval.

Cap: 1 time per programme · One-Time — available to first team to achieve it

CONTENT DEPARTMENT TASKS

(13 Tasks · Grades D → S)

TASK_C01 — Social Media Posts Published Grade D | 30 GBP | Open | Content

Who can do it: Any participant with basic social media skills

Estimated time: 1–2 hours

Objective: Create and publish 3 platform-native posts for an assigned brand or product across at least 2 platforms (Instagram, LinkedIn, Facebook, or X). Each post must include an original visual or graphic, a caption with relevant hashtags, and a call-to-action.

Expected output: 3 live posts, each suited to its platform's format and audience tone.

Proof required: Direct links to all 3 published posts + screenshot of engagement (likes/views) within 24 hours.

Cap: 3 times per month per person

TASK_C02 — Product Descriptions Written Grade D | 35 GBP | Open | Content

Who can do it: Any participant with writing skills

Estimated time: 1–2 hours

Objective: Write SEO-optimised product descriptions for 2 assigned products. Each description must include a headline, 150–250 word body copy covering key features and benefits, 3–5 bullet points, and a closing purchase CTA. Tone must match the assigned brand voice.

Expected output: 2 complete product descriptions, ready for use on an e-commerce listing or website, submitted in a shared document.

Proof required: Submitted document with both descriptions + confirmation from Content Lead that tone and quality standards are met.

Cap: 3 times per month per person

TASK_C03 — Short-Form Video Created Grade C | 50 GBP | Open | Content

Who can do it: Participants with basic video editing skills (CapCut, Reels, or similar)

Estimated time: 2–3 hours

Objective: Create a 30–60 second short-form video (Reel, YouTube Short, or TikTok-style) for an assigned product or brand theme. Video must include on-screen text, background music, and end with a brand logo or CTA frame. No watermarks from editing tools.

Expected output: Finished video file in MP4 format, minimum 1080p resolution, ready to publish.

Proof required: Video file submitted for review + published post link (once approved and uploaded).

Cap: 2 times per month per person

TASK_C04 — Blog Article Written and Published Grade C | 55 GBP | Open | Content

Who can do it: Participants with writing and research skills

Estimated time: 2–4 hours

Objective: Write and publish a 700–1,000 word blog article on an assigned topic relevant to the brand or industry (e.g., "Benefits of Shungite for EMF Protection," "Ayurvedic Water Purification Methods," or a BRICS trade topic). Article must be SEO-structured with a keyword, subheadings, internal links, and a concluding CTA.

Expected output: Published article on the assigned blog platform or website with proper formatting and a featured image.

Proof required: Live article URL + word count screenshot + Content Lead approval.

Cap: 2 times per month per person

TASK_C05 — Branded Email Newsletter Designed Grade C | 60 GBP | Open | Content

Who can do it: Participants with design and copywriting skills

Estimated time: 2–3 hours

Objective: Design and draft a complete branded email newsletter for an assigned campaign theme (product launch, seasonal offer, B2B partnership announcement, or educational content). Newsletter must include a header, 2–3 content sections, product feature spotlight, and a CTA button — using the brand's colour palette and typography.

Expected output: Finished email design as a ready-to-send template in Mailchimp, Canva, or equivalent, reviewed and approved by the Content Lead.

Proof required: Screenshot of final newsletter design + live template link or exported file.

Cap: 2 times per month per person

TASK_C06 — 30-Day Content Calendar Built Grade B | 80 GBP | Open | Content

Who can do it: Participants with content strategy or planning experience

Estimated time: 3–4 hours

Objective: Build a complete 30-day social media content calendar for an assigned brand account. Calendar must include post date, platform, content type (Reel, carousel, static, story), topic/theme, caption draft, and hashtag set for every entry. Must cover at least 3 platforms.

Expected output: Shareable calendar in Notion, Google Sheets, or equivalent — with all 30 days populated and at minimum 5 different content formats included.

Proof required: Live shareable link to completed calendar + Content Lead approval.

Cap: 1 time per month per person

TASK_C07 — Competitor Content Audit Completed Grade B | 90 GBP | Open | Content

Who can do it: Participants with analytical and research skills

Estimated time: 3–5 hours

Objective: Conduct a structured content audit of 3 competitor or comparable brands across their social media and website. For each brand, document: content themes, posting frequency, best-performing post types, tone of voice, hashtag strategy, and estimated engagement rate. Conclude with 5 strategic recommendations for the assigned brand.

Expected output: 800–1,200 word report with screenshots, comparison table, and a ranked list of 5 actionable recommendations.

Proof required: Submitted report document + Content Lead sign-off.

Cap: 1 time per month per person

TASK_C08 — Influencer Research List Compiled Grade B | 100 GBP | Open | Content

Who can do it: Any participant with social media platform knowledge

Estimated time: 3–4 hours

Objective: Research and compile a curated list of 20 relevant influencers or content creators for an assigned product category (wellness, spirituality, Ayurveda, sustainable living, or BRICS trade topics). Each entry must include: handle, platform, follower count, average engagement rate, content niche, contact email or DM option, and a relevance score (1–5) with justification.

Expected output: Spreadsheet with 20 complete, verified influencer profiles.

Proof required: Submitted spreadsheet + 3 sample posts linked to show content fit.

Cap: 1 time per month per person · One niche per submission

TASK_C09 — Video Ad Script and Storyboard Produced Grade A | 150 GBP | Open | Content

Who can do it: Participants with scriptwriting or storytelling skills

Estimated time: 4–6 hours

Objective: Write a complete 60–90 second video advertisement script for an assigned product, along with a scene-by-scene storyboard (minimum 8 frames). Script must include spoken lines, on-screen text, visual direction notes, background

music suggestion, and a closing CTA. Storyboard can be hand-drawn, digital, or created in Canva.

Expected output: Script document + storyboard (PDF or image file), approved by Content Lead before production.

Proof required: Submitted script + storyboard file + Content Lead approval note.

Cap: 2 times per month per person · One product per submission

TASK_C10 — Influencer Outreach Campaign Executed Grade A | 170 GBP | **Open | Content**

Who can do it: Participants who have completed Task C08 or have an approved influencer list

Estimated time: 3–4 hours active + follow-up period

Objective: Execute a personalised outreach campaign to 10 influencers from the approved list. Each message must be customised to reference the creator's specific content, explain the collaboration offer clearly, and include a branded media kit or product summary. Minimum 3 positive responses required for full completion.

Expected output: 10 outreach messages sent, with at least 3 responses showing genuine interest (reply, request for product details, or agreed collaboration).

Proof required: Screenshot of all 10 sent messages + screenshots of 3+ responses + summary note on next steps with each interested creator.

Cap: 1 time per month per person

TASK_C11 — Full Product Launch Content Pack Delivered Grade A | 200 GBP | **Unique | Content**

Who can do it: Participants with strong multi-format content creation skills

Estimated time: 6–8 hours

Objective: Produce a complete launch content pack for an assigned product, covering: 1 launch announcement post per platform (3 platforms), 1 launch Reel or short video, 1 press release draft, 1 product email announcement, and a set of 5 story frames. All assets must be on-brand and ready to publish.

Expected output: Full asset pack — all files delivered together in a shared folder, reviewed and approved by the Content Lead.

Proof required: Shared folder link with all assets + Content Lead sign-off.

Cap: 1 time per programme · Unique — one per team

TASK_C12 — Content Piece Achieves Significant Organic Reach Grade S | 350 GBP | Open | Content

Who can do it: Any participant with published content on an assigned brand account

Estimated time: Variable — dependent on organic performance

Objective: Create and publish a content piece that organically achieves a minimum of 10,000 views, impressions, or reach on any single platform within 7 days of posting — without paid promotion. Content must be original, brand-relevant, and posted on an approved team account.

Expected output: One viral or high-reach content piece with verified platform analytics showing 10K+ organic reach within 7 days.

Proof required: Live post link + platform analytics screenshot showing reach/impressions + Content Lead confirmation that no paid promotion was used.

Cap: Unlimited · Each qualifying post counts as one submission

TASK_C13 — Brand Content and Style Guidebook Created Grade S | 400 GBP | One-Time | Content

Who can do it: Participants with branding, design, and content strategy experience — Content Lead approval required before starting

Estimated time: 8–12 hours

Objective: Build a comprehensive brand content and style guide covering: brand voice and tone (with do/don't examples), visual identity guidelines (colours, fonts, logo usage), platform-specific content rules, photography and imagery guidelines, hashtag strategy, and a content category framework for at least 5 recurring content pillars. Guide must be designed as a professional, shareable PDF document.

Expected output: Complete brand guidebook in PDF format, minimum 15 pages, approved by both Content Lead and Ops.

Proof required: Final PDF submitted + Content Lead and Ops approval + presented to team in a short walkthrough session.

Cap: 1 time per programme · One-Time — available to first team to submit an approved version

OPERATIONS DEPARTMENT TASKS

(12 Tasks · Grades D → S)

TASK_O01 — Team Activity Report Submitted Grade D | 25 GBP | Open | Operations

Who can do it: Any participant

Estimated time: 30–60 minutes

Objective: Compile and submit a structured weekly activity report for your team covering tasks completed, GBP earned, tasks in progress, blockers, and planned actions for the coming week. Report must be clear, accurate, and submitted by the assigned deadline each week.

Expected output: One complete weekly report per submission, covering all active team members.

Proof required: Submitted report document or form response to Ops + timestamp confirming on-time submission.

Cap: Once per week per team (counts for the submitting participant)

TASK_O02 — Meeting Formally Documented Grade D | 30 GBP | Open | Operations

Who can do it: Any participant attending a team or cross-team meeting

Estimated time: 30 minutes post-meeting

Objective: Write and distribute formal, structured minutes for a team meeting or cross-departmental session. Minutes must cover: attendees, agenda items discussed, key decisions made, action items with owners and deadlines, and next meeting date.

Expected output: Formatted meeting minutes document distributed to all attendees within 2 hours of the meeting ending.

Proof required: Minutes document + evidence of distribution (forwarded email, Telegram message, or WhatsApp screenshot to group).

Cap: Unlimited · Each unique meeting counts once

TASK_O03 — Standard Operating Procedure (SOP) Written Grade C | 50 GBP | Open | Operations

Who can do it: Participants with process documentation skills

Estimated time: 2–3 hours

Objective: Write a clear, step-by-step Standard Operating Procedure (SOP) for an assigned team process (e.g., task submission workflow, lead handover process, content approval process, or order fulfilment steps). SOP must include purpose, scope, step-by-step instructions, responsible roles, and an escalation path.

Expected output: Complete SOP document, minimum 400 words, formatted and ready for use by any team member regardless of prior experience.

Proof required: Submitted SOP document + Ops approval.

Cap: 2 times per month per person · One process per submission

TASK_O04 — Onboarding Package Prepared for New Participant Grade C | 55 GBP | Open | Operations

Who can do it: Participants with organisational and communication skills

Estimated time: 2–3 hours

Objective: Prepare a complete onboarding package for a new team member joining the Business Lab. Package must include: welcome message, overview of team structure, links to all key resources and tools, explanation of the GBP system, first-week task suggestions, and key contacts with roles.

Expected output: Structured onboarding document or Notion page — comprehensive enough for a new participant to self-onboard without additional guidance.

Proof required: Submitted onboarding package + Ops review and approval.

Cap: 1 time per month per person

TASK_O05 — Team Budget Tracker Built Grade C | 60 GBP | Open | Operations

Who can do it: Participants with spreadsheet or financial tracking skills

Estimated time: 2–3 hours

Objective: Build a functional budget tracking spreadsheet for the team covering: task-related expenses, tool subscriptions, outreach costs, and any approved operational spend. Tracker must include income vs. expenditure view, category breakdown, and a running balance. Must be shareable and updateable by the team.

Expected output: Live shared spreadsheet with at least 2 weeks of data populated, categorised correctly, and with a summary dashboard view.

Proof required: Live shared link + screenshot of summary view + Ops approval.

Cap: 1 time per month per person

TASK_O06 — Risk Register Created Grade B | 80 GBP | Open | Operations

Who can do it: Participants with strategic thinking or project management experience

Estimated time: 3–4 hours

Objective: Create a comprehensive risk register for the team's current operational activities. Register must identify at least 10 risks across categories such as sales pipeline risk, content compliance, tech failure, supply chain delay, and team engagement. For each risk: include likelihood (H/M/L), impact (H/M/L), current mitigation, and contingency plan.

Expected output: Structured risk register with 10+ entries, reviewed and usable for real operational decisions.

Proof required: Submitted risk register document + Ops approval.

Cap: 1 time per month per person

TASK_O07 — Cross-Team Coordination Session Facilitated Grade B | 90 GBP |
Open | Operations

Who can do it: Participants with facilitation or leadership skills

Estimated time: 1 hour prep + 1 hour session

Objective: Plan and facilitate a structured cross-departmental coordination session involving participants from at least 2 different teams or departments. Session must have a defined agenda, produce at least 3 agreed action items, and be documented in formal minutes.

Expected output: Facilitated session with 6+ participants from 2+ departments, resulting in documented action items distributed within 2 hours.

Proof required: Session agenda (shared beforehand) + attendance screenshot or participant list + meeting minutes + Ops confirmation.

Cap: 2 times per month per person

TASK_O08 — Vendor or Tool Research Report Completed Grade B | 100 GBP |
Open | Operations

Who can do it: Participants with research and evaluation skills

Estimated time: 3–5 hours

Objective: Conduct a structured research and comparison report on at least 4 vendors, tools, or service providers for an assigned operational need (e.g., CRM tools, shipping partners, certification labs, payment gateways, or B2B marketplace options). Report must include feature comparison, cost breakdown, pros and cons, and a recommended choice with justification.

Expected output: 800–1,200 word report with comparison table and a final recommendation.

Proof required: Submitted report + Ops review.

Cap: 1 time per month per person · One category per submission

TASK_O09 — Full Team Performance Dashboard Built Grade A | 150 GBP |
Unique | Operations

Who can do it: Participants with data organisation and dashboard-building skills

Estimated time: 5–7 hours

Objective: Build a live, shareable team performance dashboard tracking: GBP earned per participant, tasks completed by category and grade, weekly activity trends, and departmental contribution breakdown. Dashboard must update dynamically or be clearly designed for easy weekly manual update.

Expected output: Live dashboard (Google Sheets, Notion, or equivalent) covering all active team members across all 3 departments, with at least 4 weeks of tracking structure in place.

Proof required: Live shareable link + screenshot of populated dashboard + Ops approval.

Cap: 1 time per programme · Unique — one per team

TASK_O10 — Complete Operations Playbook Delivered Grade A | 160 GBP | Unique | Operations

Who can do it: Participants with strong documentation and process design skills — Ops Lead approval required before starting

Estimated time: 7–10 hours

Objective: Create a comprehensive operations playbook for the team covering: task lifecycle (creation to reward), communication protocols, escalation hierarchy, GBP tracking and audit process, disciplinary procedure reference, and a quick-reference guide for new Ops participants. Must be formatted as a professional, navigable document.

Expected output: Complete playbook document, minimum 20 pages or equivalent Notion structure, approved by the Ops Lead and Chief Administrator.

Proof required: Final document submitted + Ops Lead and Chief Administrator sign-off.

Cap: 1 time per programme · Unique — one per team

TASK_O11 — Admin Audit Report: GBP Accuracy Verified Grade A | 180 GBP | One-Time | Operations

Who can do it: Participants with high trust rating and Ops Lead approval only

Estimated time: 5–6 hours

Objective: Conduct a full audit of GBP allocations for an assigned set of 6 teams covering a specified time period. Cross-check all task submissions against proof provided, verify completion percentages applied correctly, and flag any discrepancies or unresolved submissions. Produce an audit summary report.

Expected output: Audit report covering all 6 assigned teams, with discrepancy log and recommended corrections, submitted to the Chief Administrator.

Proof required: Audit report + Chief Administrator confirmation of receipt.

Cap: 1 time per programme · One-Time per audit period

TASK_O12 — Cross-Team Systems Integration Delivered Grade S | 300 GBP | One-Time | Operations

Who can do it: Participants with advanced operational or systems thinking skills — Ops and Chief Administrator approval required

Estimated time: 10–15 hours across multiple sessions

Objective: Design, implement, and hand over a fully integrated operational system connecting task tracking, GBP recording, content scheduling, and sales pipeline management into a single unified workspace (Notion, Airtable, or equivalent). System must be usable by all 30 teams and all 5 admins, with clear permissions, documentation, and a training walkthrough session delivered to the Ops team.

Expected output: Live, fully operational unified workspace with onboarding guide, permission structure, and a completed training session delivered to at least 3 admins.

Proof required: Live workspace link + documentation file + recording or notes from training session + Chief Administrator sign-off.

Cap: 1 time per programme · One-Time — awarded to first team to deliver an approved system

This catalogue will be updated as required. Any amendments will be issued under a separate Amendment Notice bearing its own reference number and will be communicated to all participants through official channels.

Participants are encouraged to direct any queries regarding task eligibility, grading, or proof requirements to the Operations team before beginning a submission — not after.

We wish all teams a productive and high-performing programme.
